Graffiti Solution System®

Product Description, Applications

The Graffiti Solution System® (GSS) is a preventive system for graffiti control utilizing a permanent anti-graffiti coating process and a simple graffiti removal process. It is designed for maintenance of a graffiti free environment where graffiti taggings are removed immediately upon discovery, leaving no evidence of graffiti. The coating can withstand repeated graffiti removals using Erasol® remover without reapplication. This system is easy and economical and the property remains permanently protected against future taggings.

The eight different base coatings provide different performance and aesthetic qualities for a variety of substrates with a wide range of coating combinations including:

- Completely natural appearance: natural masonry, stone, EIFS or other architectural finishes are virtually unchanged
- Pigmented, glossy appearance
- Clear or pigmented with flat, semi gloss, or gloss finishes; offers an unlimited number of architectural choices.

GSS-10 Anti-Graffiti Coating is a high performance, permanent finish coating that assures years of high UV, stain, chemical and abrasion resistance.

Erasol graffiti remover product is sprayed on by bottle and agitated over the graffiti tag. It is then hosed off by a regular garden hose. This biodegradable, nonflammable, nontoxic product has a pH of 7.5 which allows safe entrance into ground water. Erasol can be readily degraded by typical waste water treatment plant organisms. Erasol enables graffiti removal without the need for sand or soda blasting equipment or high pressure, hot water washing systems.

Although the Graffiti Solution System is not used on glass, polyethylene and polypropylene surfaces, it is ideal for use on a wide array of substrates including:

- Metal
- Concrete
- Brick
- Vinyl
- Stone
- Signs or painted surfaces
- Stucco
- Concrete masonry
- Murals
- Wood
- EIFS

Features, Advantages

- Permanent coating
- Withstands unlimited removals
- VOC compliant; vapor permeable
- Excellent abrasion, corrosion, and salt spray resistance
- UV and stain resistant
- Non chalking; non yellowing
- Years of successful field applications

Properties, Performance

- FDA/USDA approved
- Various federal, state and city testing and approvals on all types of surfaces

Warranty

The Graffiti Solution System features a limited, 10 year performance warranty.
