

CodePro is a revolutionary electronic code access system designed primarily for the vacation property management market. You can instantly provide your rental clients and housekeeping with access to a specific property for a specific period of time, without the need for a key or keycard.

CodePro is an all-encompassing system, combining a PIN code access software with a unique two-piece modular electronic lock for guest doors or wall unit module for common-used doors.

CodePro is an enterprise software, which is backed by more than 10 years of experience by Onity. It is designed to be hosted by the Client or by Onity.

CodePro System Features

The major function of the CodePro Software is to provide and easy to use, secure and manageable solution to the end-user. The system software is designed to allow an interface with Property Management Systems (PMS) for PIN generation and retrieval.

- Software options
- Both time-based AND fixed based codes
- User management
- Door management
- Operator management
