Engineered Wood Products
FSC Certified
RigidLam® LVL

Roseburg has done it
again, introducing...

**FSC Certified
RigidLam® LVL**

FSC Supplier
SCS-COC-000300

The mark of responsible forestry
© 1996 Forest Stewardship Council A.C.

*Architects, structural engineers
and builders can now specify an
FSC certified engineered wood product
that can contribute to achieving additional
LEED® credits for your project.*

FSC Certified RigidLam® LVL

Roseburg has been certified by Scientific Certification Systems (SCS) to produce Forest Stewardship Council (FSC) Certified RigidLam® LVL under registration code SCS-COC-000300. Wood products certified by SCS are recognized as coming from well-managed forests, adhering to strict environmental and socioeconomic standards in accordance with the principles and criteria of the FSC.

RigidLam® LVL FSC certified products are manufactured under the Mixed Credit system. LEED grants 100 percent credit for Mixed Credit products.

Roseburg's RigidLam LVL is a stronger, stiffer, more consistent and more predictable building material. Compared with similar sized sections, our RigidLam LVL headers and beams can support heavier loads and allows greater spans than conventional lumber.

FSC certified RigidLam LVL is available on a made-to-order basis in 1.5E and 2.0E grades, in thicknesses of 1-1/2", 1-3/4", 3-1/2", 5-1/4" and 7" and standard depths from 3-1/2" to 18". The product will carry the standard Roseburg information along with an FSC logo stamp for visual identification.

Roseburg's engineered wood products are engineered to the high-quality APA standards and are compatible with standard hangers and connectors. RigidLam LVL is part of The Roseburg Framing System® which consists of: RFPI® Joists used in floor and roof construction; RigidLam® LVL which is used for headers, beams, studs and columns; and RigidRim® Rimboard.

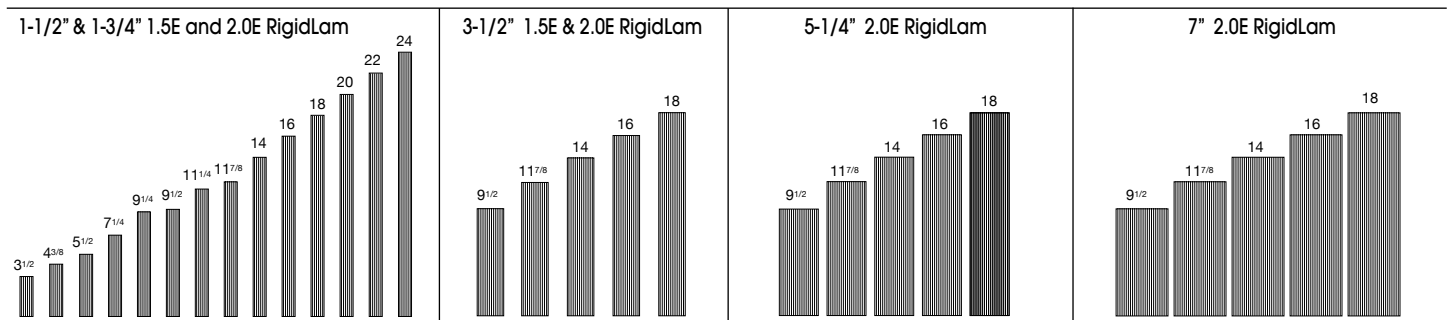

Roseburg, a member of USGBC and one of the nation's largest producers of no added urea formaldehyde (NAUF) and FSC certified wood products, produces the FSC Certified RigidLam LVL at its 750,000 sq. ft engineered wood product plant located in Riddle, OR.

FSC certified RigidLam LVL is available through Roseburg's nationwide network of wholesale distributors and Pro Yards.

LEED CATEGORY/CREDIT	INTENT	REQUIREMENTS	POSSIBLE POINTS
Materials and Resources MR 5.1 Regional Materials: <i>10% Extracted, Processed & Manufactured Regionally</i>	Increases the use of materials that are extracted and manufactured within the project region	A min. of 10% of the combined value of building materials or products must be extracted, harvested, or recovered, as well as manufactured within 500 miles of the project	1 point
Materials and Resources MR 5.2 Regional Materials: <i>20% Extracted, Processed & Manufactured Regionally</i>	Increases the use of materials that are extracted and manufactured within the project region	A min. of 20% of the combined value of building materials or products must be extracted, harvested, or recovered, as well as manufactured within 500 miles of the project	1 point (in addition to MR credit 5.1)
Materials and Resources MR Credit 7.0: Certified Wood <i>FSC - Forest Stewardship Council</i>	Encourage environmentally responsible forest management	Use a minimum of 50% wood based materials and products, which are certified in accordance with the Forest Stewardship Council's (FSC) Principles and Criteria, for wood building components	1 point
