NSG Group Flat Glass Business

## **Pilkington NSG Group, introduces the production of Optiwhite™ Low Iron Glass in North America.**

Pilkington is proud to announce the production and availability of **Optiwhite™** low iron float glass at its Laurinburg, North Carolina facility. The trend to decorative glass and the overall push to higher daylight transmittance products have created this opportunity in North America.

Pilkington **Optiwhite™** has a near colorless appearance which is remarkably noticeable as compared to standard clear float glass. **Optiwhite™** glass offers enhanced aesthetics for a wide variety of applications, including but not limited to; storefronts, showers, appliances, decorative and furniture applications, photovoltaic modules and solar collectors.

In 1984, Pilkington began producing low iron glass in Europe. Since then, **Optiwhite™** has shown continued growth and popularity, and as a result, is now being produced on two continents.

**Optiwhite™** is readily available; please contact your local sales representative at 800 221 0444 for sizes, thicknesses, literature and samples.

The Flat Glass business of the NSG Group, operating under the Pilkington brand, is one of the world's largest manufacturers of glass and glazing products for the building and automotive markets, with manufacturing operations in 29 countries on four continents and sales in 130 countries
