

RUSTICSERIES™

THE NATURAL LOOK OF WOOD COMBINED WITH
THE QUALITIES OF FIBER CEMENT SIDING.

COLORGUARD™
BY WOODTONE

THE ORIGINAL...

RUSTICSERIES™ COATING TECHNOLOGY

- BETTER FOR THE ENVIRONMENT
- ENHANCED CURB APPEAL FOR FIBER CEMENT SIDING
- BUILDER APPROVED

RusticSeries

Our proprietary, two coat system is designed to not only enhance the curb appeal of your siding project; it also protects the siding for lasting beauty. When siding protection and curb appeal are important to you, don't be fooled by similar "look alike" products, there is only one RusticSeries™ ...delivered by Woodtone.

Features and Benefits

- Enhanced grain definition, real wood appearance
- Controlled oven curing system
- Superior quality acrylic latex paint with proven long term performance
- Multiple designer colors available
- Consistent coating application unlike field spray application
- 10 year transferable warranty

always there, naturally

Manufacturing Process

Under a controlled manufacturing environment, the RusticSeries™ begins with a coating that has been time tested and builder approved under extreme weathering conditions. The proprietary coating process then undergoes additional quality checks to ensure the finished product is consistent in color and application, providing optimal performance on your next project. Our newest production facility uses the latest technologies in coating applications, and combined with a team with over 30 years of experience, you can trust Woodtone for all your coating needs.

Color Selection

The RusticSeries™ is available in a variety of designer colors, recommended by builders and designers across North America. Creating the “natural look” of wood on cement siding is a unique challenge, and you can trust Woodtone’s experts to obtain the look you desire.

Product Availability
