

FIREGUARD™ PEACE OF MIND

FIREGUARD™
BY WOODTONE

**EXTERIOR REAL WOOD
FASCIA AND TRIM WITH A
CLASS A FIRE RATING**

FireGuard™

FireGuard™ is a Class A certified real wood exterior trim and fascia product, coated with an intumescent material which expands upon exposure to heat or flame providing added protection against Mother Nature's most challenging element – FIRE. FireGuard™ is the desired trim and fascia product for builders in all areas, including those with various Wildland Urban Interface fire code requirements. Available in most common profiles and dimensions, FireGuard™ provides you with the peace of mind that you have taken the additional steps to enhance the protection of your home. FireGuard™ meets the requirements of having a Class A (formerly Class 1) Fire Rating with a Flame Spread rating of less than 25.

COATING TECHNOLOGY

FireGuard™ products are coated through an exclusive partnership with NoFire™ Technologies Inc. utilizing their industry leading ultra low V.O.C. fire retardant paint. With approvals and testing from the Department of the Navy, State of California – State Fire Marshal (C-20501), UL classification and numerous other governmental agencies, NoFire™ coating provides the peace of mind builders and homeowners require. For additional testing and approval please visit our website.

Design Flexibility

- Fascia Boards
- Band Boards
- Window/Door Trim
- 2" Garage Door Liner
- Column Wrap
- Rake/Frieze Boards

FireGuard™ Warranty

FireGuard™ is backed by a no-nonsense FireGuard™ warranty against rot. The FireGuard™ warranty gives you the security and trust you need when making your buying decision. For a copy of the warranty program please visit our web site.

always there, naturally

Features and Benefits

Coated All Sides	FireGuard™ is flood coated on all six sides through a sophisticated process offering superior protection against Mother Nature's most challenging element - FIRE
Simple Installation	FireGuard™ is a real wood substrate requiring no special tools for installation.
Class A Fire Rating	With a flame spread or surface burn rating of less than 25, FireGuard™ is your preferred choice for flame resistance.
Environmentally Friendly	Fireguard™ is manufactured from the certified renewable forest resources of British Columbia, combined with an ultra low V.O.C. coating technology.
Cost Savings	Significant cost savings compared to other Class A rated materials.

Manufacturing Process and Code Compliance

We hand select our products to provide you an appearance grade trim and fascia product that delivers the curb appeal and quality buyers expect. Our products are coated using specially designed machines to provide FireGuard™ with the optimal amount of primer coverage to ensure long-term performance in the field.

Builders and homeowners depend on FireGuard™ to comply with various regulations and building codes. The only way to be sure of that compliance is by accredited third party testing and inspection. Woodtone maintains flame spread and smoke

developed listings for FireGuard™ at Intertek by using the ASTM E84 "Standard Test Method for Surface Burning Characteristics of Building Materials. To maintain the listing at Intertek Woodtone participates in a follow-up audit program, including quarterly tests in accordance with Intertek testing policies.

Extended Warranties

National paint and sealant manufacturers have tested and approved FireGuard™ for use with their products and offer extended top-coat warranties when their coatings are used with FireGuard™. Also available is FireGuard™ CG (ColorGuard™ Coating System). These warranties will extend top-coat protection up to 25 years. Visit www.woodtone.com for a list of our paint and sealant partners.

Installation

Simple installation practices make FireGuard™ the preferred choice for framers, siding contractors and builders alike. Traditional tools such as saws, hammers and nails are all you need. As with any trim product, it is important to protect FireGuard™ prior to installation by keeping it covered and up off the ground. Adherence to local building codes and following our installation instructions will result in product performance that you can trust. View our installation instructions at www.woodtone.com.

Availability

FireGuard™ is readily available throughout the United States and Canada through building material dealers. For multi-family jobs and large scale projects we can deliver direct to the job-site. For a dealer near you, please give us a call.
