

READY-ANGLE™

A RADIUS TRACK® PRODUCT

Hand-bendable Ready-Angle is the fast and dependable way to create an accurate curved shape while you're on the job site. Sold in straight sections at your local supplier, Ready-Angle holds its shape once formed and requires no screws, so it installs rapidly and greatly reduces labor costs.

Ready-Angle is the most versatile and indispensable material around - especially for curved surfaces. Without any tools you can quickly create S-shapes, spirals, sweeps or any free-form shape. Use convenient and economical Ready-Angle to create soffits and arches for attaching steel or wood studs. Ready-Angle curves in multiple directions at the same time, so it's easy to form challenging compound curves and S-bends. You can also use two pieces of Ready-Angle to create curved tracks for steel and wood studs. With Ready-Angle, you can quickly form arches of any depth.

Ready-Angle is an ideal alternative to cutting, snipping, or other shaping methods with wood or steel on the job site. It is more economical to use than other products that may require extra on-site assembly.

Contact your local distributor for Ready-Angle pricing and availability.

APPLICATIONS

Ready-Angle can be used for virtually everything.

PRODUCT SPECIFICATIONS

ASTM A653 galvanized steel 30 mil (20-gauge)
ASTM A653 coating designation G-60
10" minimum curve radius

STANDARD SIZES

RL150-8 (1-1/2" x 1-1/2" x 8' length)
RL150-10 (1-1/2" x 1-1/2" x 10' length)
