

RSMeans

On-Site Training

RSMeans On-Site Training offers custom content, convenience and professional skill development for your staff.

Our training sharpens professional skills for accurate construction estimating, streamlines facilities maintenance and provides proven approaches for senior management to effectively manage the complete construction process.

Clients may select a wide range of topics that are adaptable to fit your particular business and training needs. Professionals nationwide from every segment of the construction, design and building management industry have benefited from RSMeans On-Site Training. It is ideal for corporations, institutions, government agencies military services and contractors.

These sessions are intensive two-day programs complete with workbooks, reference materials and instructors with decades of experience.

Many of these courses are approved for credit by the AACE International Certification Board and meet CES requirements of many organizations.
