

RSMeans

Seminars Available

Seminars

Designed for industry professionals, RSMeans educational programs are intensive sessions aimed at improving cost estimating, project management, administration, and facilities management skills.

RSMeans educational programs are available through our public seminar series or can be delivered on-site at your facility.

Courses include instruction, text and workbooks.

RSMeans seminars are approved for Continuing Education Units by both the American Institute of Architects Continuing Education Systems (AIA/CES) and AACE International Certification Board.

To inquire about or register for a seminar, call toll free at: 1-800-334-3509 ext. 5115.

Information is available online at:

Facilities/Repair & Remodeling Estimating
Professionals working in facilities management get help with daily challenges in establishing budgets for all phases of projects.

Green Building Planning & Construction
Gain an understanding of technologies, design concepts and costs in light of stricter building codes, energy efficiencies, and standards.

Site Work & Heavy Construction Estimating
Learn to estimate earthwork, site utilities, foundations and site improvements — using both the assembly and the unit price methods.

Assessing Scope of Work for Facilities Construction Estimating
Addresses the importance of understanding the scope of projects to arrive at accurate cost-estimating. Real life projects are reviewed.

Unit Price Estimating
Learn to interpret project information and process it into final, detailed estimates with accuracy. Covers quantity takeoff, direct and indirect construction costs, and much more!

Means CostWorks® Training
Become more familiar with the functionality of Means CostWorks CD program. Each menu, icon, screen and function is explained in-depth.

Mechanical & Electrical Estimating
Learn to prepare accurate and complete mechanical/electrical estimates. Avoid the pitfalls of omission and double-counting.

Square Foot & Assemblies Cost Estimating
Learn to deliver accurate square foot assemblies (systems) estimates when detailed construction documents are not yet available. See how to make construction cost comparisons.

Scheduling & Project Management
Get the most current and proven scheduling and management techniques to bring projects in on time and on budget. Learn about cost controls and computer-based systems.

Facilities Maintenance & Repair Estimating
Learn to plan, budget, and estimate the cost of ongoing — and preventive maintenance and repair for existing buildings and grounds. Covers in-house and contract-out service costs.

Facilities Construction Estimating
Topics covered include the estimating process, project costing, labor hours estimating, and dealing with on-going operations issues.

Practical Project Management for Construction Professionals
Obtain essential knowledge and develop the required skills to be efficient and effective in executing the day-to-day responsibilities of the construction project manager.
